Jonathan Wood : Coachbuilding (Shire Library) before purchasing it in order to gage whether or not it would be worth my time, and all praised Coachbuilding (Shire Library):

1 of 1 people found the following review helpful. Not about coach building per se, but the history of coach building companies. By Carolyn J. My husband is a coach-builder and he is working on a very difficult project. He bought this book hoping there would be information regarding coach building and hand-crafting car bodies. It is not. It is a history of various coach-building companies, and pictures of the cars. The book itself is very small, more like a booklet. It is about 6x8, and 1/4 inch thick. 0 of 2 people found the following review helpful. Four Stars By James H. Cowart thanks

This account examines the history of coachbuilding, beginning with the coachbuilders who for generations had built horse-drawn wooden carriages, and then explaining how they turned their craft to building the bodywork of the first motorised cars. Using photographs of the different stages of coachbuilding, the author describes the materials, equipment and key techniques involved. Today the profession of coachbuilding is almost a lost art, yet as the restoration of vintage cars seeks to keep the trade alive, this book reflects back on the heyday of the coachbuilt motor car and the skilled workers that made it their craft.

About the AuthorThe author of some thirty-five books on the motoring of yesteryear, Jonathan Wood has made a particular study of the histories of Britain's multifarious car makers. He has received the Guild of Motoring Writers' Montagu Trophy and the Society of Automotive Historians' Cugnot Award.
