Peter Bohan, Philip Hammerslough : Early Connecticut Silver, 1700–1840 (Garnet Books) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Early Connecticut Silver, 1700–1840 (Garnet Books):

1 of 1 people found the following review helpful. illustrated reference work for early American silverware By Henry Berry The work is basically a catalog of outstanding pieces of Connecticut hollowware and flatware plus a few pieces of different types with silver as part of them such as swords, pepperboxes (pepper shakers), and one pair of shoe buckles. The paperback edition is the same as the hardcover put out in 1970 with the addition of the Introduction by Eisenbarth. In this new section of about 25 pages, Eisenbarth gives background on the early American silver and profiles of the leading silversmiths. The pieces are shown in photographs one per page except for a few smaller items such as the pepperboxes which are two to a page. The factual information provided below each photo is just what collectors and researchers and the like are interested in. Such information is identification and date of the piece, the

silversmith who made it, description, inscription, maker's mark, dimensions, and lastly in italics the current owner of the piece, in most cases a private collector or a museum. The descriptions provide the basics of the design which might not or can not be known by the photo alone; such as "round, tapered body, slightly everted lip, flat bottom" for one of the silver beakers, and "oval bowl, narrow handle stem flattening to pointed, downturned end" for the 1792 serving spoon facing it. Combined with the dimensions of height, etc., also noted, one gets an accurate and useful image of each item. Although the catalog includes only Connecticut silver of the period covered, it serves as a catalog and reference for all early American silver, i. e., of the Colonial period and the first decades of the American republic after the Revolutionary War. At this time, Connecticut along with Massachusetts and to some extent Philadelphia and a couple of other isolated spots were the centers for high-quality silver pieces. Moreover, there was not that much variation in the kinds of pieces or their styles. The photographs make an ideal visual reference. Collectors, antique dealers, historians, etc., will appreciate especially as well the 45 notes to Eisenbarth's Introduction, the biographical notes on the Connecticut silversmiths, and the five-page selected bibliography. The 15-page Index of Marks with close-up photographs of numerous silversmiths' marks capturing the details of them is yet another aspect making the book a top work for readers in its field of collecting and early Americana.

Early Connecticut Silver is a catalog of the most significant pieces of silver hollowware made by Connecticut silversmiths between the years 1700 and 1840, as well as representative flatware and other pieces such as swords and Masonic jewels. In all, it constitutes an exhibit that could never be mounted in a single museum, and one that proves the authors' conviction that Connecticut silver is distinctive and worthy of comparison to the more sophisticated contemporary styles associated with the silversmiths of Boston and New York City. Wesleyan is proud to offer a new edition of this essential work, featuring an introduction by Erin Eisenbarth that brings the coverage up to date, incorporating the research done on this subject since the original publication. The book still includes an introductory essay that defines "the Connecticut school," and an annotated index of silversmiths known to have worked in Connecticut and an index of the marks used by them.

"It is highly improbable that any subsequent work on the subject could surpass this book... Bohan and Hammerslough have covered the subject with unprecedented thoroughness."—Choice
