So many that it is almost like it wasn't proof read at all. Shameful and such a poor reflection on the author and ETSY. 121 Pages and it could really have been done in 45. Don't waste your money on this as it will disappoint and then make you angry you spent your good money on it!0 of 0 people found the following review helpful. You should know the trend today!By Andrea TorreI love creating stuff like Origami that made out of papers or a flower vase that is made up of newspapers. I do consider myself as a creative one because I do not like things that looked boring, I want to create something new for that thing! My friends recommended me that I should put my talent in work like on Etsy where you can publish, picture and sell your stuff that you've made.It is important that you should know the trend today because your target will be the teens out there!1 of 1 people found the following review helpful. Book written by a complete idiot!!!!By L WillisI'm very sorry that I purchased this. The book was a total waste of time and money. The first hint that this was a mistake was the large volume of misspelled words. It is very repetitive. All of the information and more is available on the Etsy website. Don't waste your money!
