Marcel Massini : Ferrari by Vignale before purchasing it in order to gage whether or not it would be worth my time, and all praised Ferrari by Vignale:

It is very nicely crafted, with a thick cover, and thick glossy pages. Not so much a coffee table book as a catalog of the 160 or so cars that Vignale and Michelotti built and designed for Ferrari, mostly in the 1950s. It does have several full-page color photos of some of the more interesting creations. It also includes 2-3 black and white photos and a race history and history of ownership for all the cars. The narrative, by Marcel Massini in Italian and English, is crisply written, entertaining, and frank, sometimes describing particular cars as ugly, "extraordinarily frightful" or with "completely undisciplined lines." Not crazy about the use of yellow on the cover, black or white would have worked better if you ask me. 3 of 3 people found the following review helpful. You need this book! By Helosixx Any book on Ferrari written by Massini is a must have. There really is nothing else to say. Well researched over decades, worth reading for content and photos not found anywhere else.
