From Drago : Flying Carpets (The French Academy in Rome - Villa Medici) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Flying Carpets (The French Academy in Rome - Villa Medici):

Flying Carpets, the seventh volume produced as part of Drago's continuing collaboration with the French Academy in Rome - Villa Medici, is the catalog for the exhibition of the same name, on display from May 30th through October 21st, 2012. The book, edited by Philippe-Alain Michaud, is made up of 144 pages with over 70 images and includes introductions by Éric de Chasse, director of the French Academy in Rome and Oliver Michelin, Director of the Musée des Abattoirs of Toulouse, as well as a critical essay by the author. While modernist tradition maintains that the carpet was used as a paradigm for the affirmation of flatness in painting, the contrary may also be said; the flying carpet can be envisaged as a way of introducing movement in surfaces that, by using the properties of expansion and

rotation, produces effects of floating, disorientation or disequilibrium. Much like the flying carpet, cinema can also involve properties or forces aimed at bringing surfaces to life - unwinding, projecting, editing - that go beyond the simple projection of a space standardized by the norms of theatricality. Thus, both the exhibition and catalogue bring together and compare real carpets and films. Carpets that, according to their function, texture or composition, produce an effect that enlivens the surfaces, and films that in this way can be reconsidered from the ornamental point of view: monochrome compositions evoking the undefined linear traces of Navajo blankets (Paul Sharits, *Nothing*), blades of grass, leaves and insect wings are directly stuck like a cinematographic equivalent of garden carpets (Stan Brakhage, *Mothlight*), positive/negative inversions producing an effect identical to that of retractable motifs (Peter Kubelka, *Adebar*), overlapping borders (Hans Richter, *Rhythm 21*), ..

About the Author Philippe-Alain Michaud is art historian and theoretician, and curator in charge of films at the National Museum of Modern Art Georges Pompidou in Paris.
