**Molly Doyle : From the Start** before purchasing it in order to gage whether or not it would be worth my time, and all praised From the Start:

After her parents get divorced, sixteen-year-old Rosalie moves to Massachusetts to live with her mom. It's there she meets Alexander, a mysterious boy with a life-threatening secret, and falls head over heels for him, despite promising him it would be the one thing she'd never do. But as Rosalie slowly starts to unravel the truth, she's faced with the

stark reality of what loving Alex really means, and whether she's strong enough to endure it. (Attention: This paperback novel is a first draft. It was published when Molly was only sixteen years of age. It will soon be re-written and edited; but for right now it is still available in paperback, as a first draft, to the public.)
