W.H.B. Smith : Gas, Air, and Spring Guns of the World (Stackpole Classic Gun Book) (Stackpole Classic Gun Books) before purchasing it in order to gage whether or not it would be worth my time, and all praised Gas, Air, and Spring Guns of the World (Stackpole Classic Gun Book) (Stackpole Classic Gun Books):

types. Many of Smith's observations continue to be relevant as most of the issues involved in airgun design really are questions of physics. While Smith's writing is a product of its time (particularly evident in the poorly translated section on air guns from a Russian encyclopedia as contrasted to the rest of the work) it is a fun and interesting time capsule from the mid 20th century. Good information especially on early Crosman, Benjamin, Webley, Weirauch, Diana, and BSA as well as others that are no longer around. Well illustrated in glorious black and white. 2 of 2 people found the following review helpful. Great historical document for Air Gun Enthusiasts! By Mark B. Ostrom Although done in black and white with rather bad illustration quality, this is the historical masterpiece of the development of modern Air Guns and air armaments circa 1950's. So detailed as to be good enough to re-manufacture some of these guns from the included drawings if one were machine shop inclined. Interesting read and must have for the Air Gun Collector. 0 of 0 people found the following review helpful. Air gun fix ups, By T. E. M. Good info, cheaper to fix them than to buy new

At the time of its publication, this was the first American text to deal with high power, high precision air and gas weapons. Representative samples of every major world manufacturer were gathered for personal testing to check the manufacturers' varying claims. It includes photographs, operational drawings, specifications, and test results of every major world manufacturer. This professional encyclopaedia is an important addition to the library of any firearms collector, dealer, or historian.

About the Author W. H. B. Smith was a consultant on military weapons to the National Rifle Association and a frequent contributor to The American Rifleman, American Legion Magazine, and The Marine Corps Gazette .
